

Reject the NAB's petition 04-160. The AIR WAVES belong to the public, and don't forget that. The FCC has constantly sided with the "BIG BROADCASTERS", and stifled the efforts of "Community Radio" and niche radio stations. Satellite Radio is a refreshing alternative and subscriber paid for service. The FCC should be concerned with the "Public's" rights and not the petitions of the Broadcasters lobbyists, who could care less about freedom of choice. The FCC should wake up the needs of the nation's communities. Commissioner Powell has proved to be an embarrassment to the "Office".
